

Junior Project Manager

We are an ambitious scale-up that offers an intelligent automation product. We help our clients provide better customer experiences and reduce workloads by automating everyday cognitive tasks.

We are looking for a highly motivated junior project manager with a keen interest in disruptive technologies and primal organizational and analytical skills to further scale our company.

What will you do?

- Work closely with the senior project manager
- Help scoping, planning and follow up projects and development work
- Follow up new client requests coming in
- You will also be helping to further set up, implement and or improve internal delivery processes
- Assist in aligning the sales and delivery team
- Perform the necessary business analysis before the start of a new project
- Play a key role in quality assurance and testing of new features and releases

Who are you?

- A highly motivated young graduate with a business-related master's degree, ideally a master's in business engineering. Some relevant working experience is a plus
- Interested in disruptive technologies and seeking to shape the future for the better
- Possess the necessary interest and skills to bridge the gap between technical and business team(s)
- Fast learner and able to work in a fast-paced environment
- Have a can-do mentality and possess the necessary flexibility to work in a scale up
- Have good analytical, organizational, planning and communication skills
- Have an advanced level of English and Dutch or French.

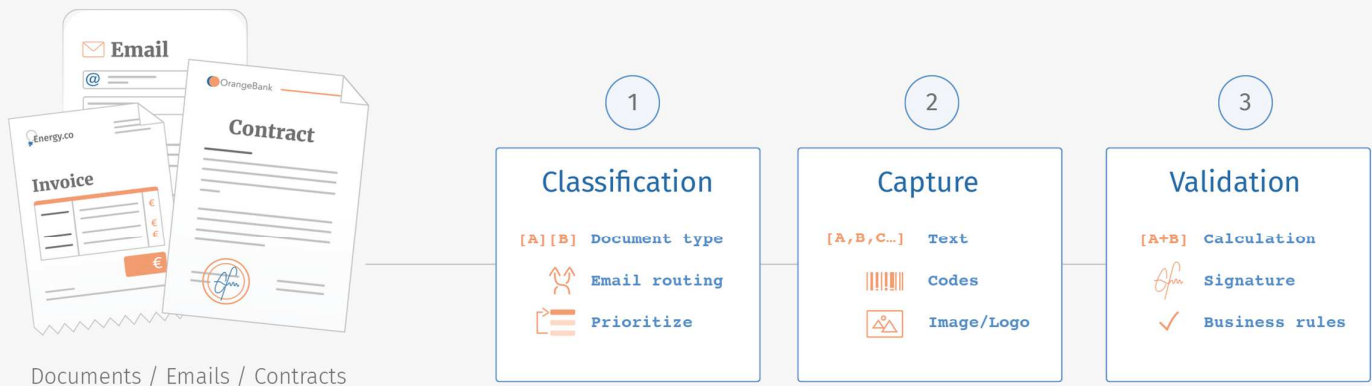

What do we offer you?

- A unique opportunity to work in a promising and fast-growing scale up
- Be part of a team working on cutting edge technology that is transforming the world
- Possibility to learn grow and further develop your career
- An attractive salary and bonus scheme
- A company car or public transport subscription
- Team building activities, after work drinks, etc.
