

Front-end Development Internship

Contract.fit is an ambitious technology company that offers an intelligent automation solution. We help our clients provide a better customer experience and reduce workloads by automating data entry and carrying out cognitive tasks.

We are looking for a motivated **Junior Front-end Developer** for an **internship** who will help us provide new features, fix bugs, help in the shift to modern technologies, and maintain our application.

What will you do?

- Solve real business problems and work closely with other developers to provide features, bug fixes and modernizing our front-end solution
- Get experience in a fast-growing scale-up with an international and dynamic team
- Be part of our agile way of working and take part in knowledge sessions

Who are you?

- A motivated junior front-end developer with knowledge of
 - **HTML, CSS, JavaScript** and **Git**
 - At least one of the popular frameworks and libraries like **Angular**, React, Vue or others
- You know the difference between ES 5 and 6, Angular and AngularJS and why node_modules should be listed in .gitignore
- Have attention to detail
- You are not afraid to search for information on Stack Overflow or ask other developers for help
- Have a portfolio of a few personal projects in the mentioned technologies
- You are a proactive team-player
- Have an advanced level of English

Appreciated extras:

- Interest in AI/ML topics
- Any previous experience in front-end/ software development
- Knowledge of Node.js

What do we offer you?

- A unique opportunity to work in a promising and fast-growing scale-up
- A great multicultural team and stimulating learning environment
- Coworking office space located in the heart of Brussels
- Team building activities, after-work drinks, etc.
