

Marketing Internship

We are an ambitious European scale-up offering an Intelligent Automation solution that helps businesses to provide better customer experiences and reduce workloads. We automate everyday cognitive tasks with the use of the latest artificial intelligence and machine learning techniques.

Join contract.fit in a Marketing internship to be able to grow your knowledge of SEO, SEA, CRO and the overall development of a marketing campaign. There is room for coming up with your own initiatives/projects, for example, if you need to work on a specific project for your school.

What will you do?

- Support the content marketing development efforts by:
 - Contributing to the creation of email campaigns (HubSpot) and social media content (LinkedIn)
 - Creating sales support materials (Canva, Photoshop)
- Help develop digital campaigns per sector or per use case by:
 - Generating use case explanations (SEO & Product marketing)
 - Writing ad-copy per campaign based on your keyword research (SEA)
- Perform market analysis and research on the latest trends, evaluating competitor marketing and digital content
- Help develop an Employer Branding strategy

Who are you?

- Excellent written & verbal business English + at least one other language (NL/FR/DE).
- A proactive, results oriented personality, comfortable working with customers.
- Excellent time-management and prioritizing abilities.
- Insatiable desire to grow yourself, your team and the company.
- Ability to be a self-starter in a fast-paced environment.
- Ambition to build a career in marketing.
- Tons of energy.

What do we offer you?

- A unique opportunity to work in a promising and fast-growing scale up.
- Be part of a high-performing team working on cutting edge technology that is transforming the world.
- A great multicultural team and learning environment.
- Team building activities, after work drinks, etc.

Intelligent Automation

Contract.fit helps companies to improve the customer experience and reduce costs by turning documents and emails into actionable data that can be extracted, classified and validated.
