

## Senior Python Software Engineer

We are an ambitious scale-up that offers an intelligent automation product. We help our clients provide better customer experiences and reduce workloads by automating everyday cognitive tasks.

We are looking for an experienced python software engineer with a proven track record to play a leading role in the deployment of our Software-as-a-Service product.

### What will you do?

- Contribute or lead development on a SaaS product with a modern stack
- Advance the various aspects of our self-learning product in line with our roadmap
- Ensure best coding practices are used throughout the company
- Work closely with other engineers (AL/front-end/infra) to align all development efforts
- Solve problems and eliminate bottlenecks
- Above all, shipping high-quality code in every sprint

### Who are you?

- An expert in Python (you offer inspiration for good coding practices and improve others' code quality)
- Proven track record in software engineering, preferably on a product
- You are familiar with most important parts of a modern SaaS stack:
  - API frameworks in python such as Django or Flask
  - Databases and ORM/ODM
  - Task brokers and message queues (celery, AMQP)
  - General software design pattern knowledge
  - CI/CD and pipelines
  - Cloud infrastructure such as AWS, Azure or GCP
  - Unit and integration testing (Pytest)

### What do we offer you?

- Unique coding and technical challenges with many opportunities to learn and improve skills
- Attractive salary and bonus schemes
- A company car, biking mileage reimbursement, or public transport subscription
- Quarterly offsites, frequent after work drinks, etc.
- 25 days vacations per year, allowed from your first year, in addition to public holidays
- A total of 13,92 salaries per year: a 13<sup>th</sup> salary in December and holiday pay of 92% a monthly gross salary in June (can be prorated depending on your starting date)
- Hospitalization insurance, disability coverage, life insurance, and extra pension contribution
- Mobile phone plan, eco-cheques, and monthly stipend of €175 to spend as you wish

# Intelligent Automation

Contract.fit helps companies to improve the customer experience and reduce costs by turning documents and emails into actionable data that can be extracted, classified and validated.

## The Intelligent Automation Solution

Documents / Emails / Contracts

### Business Challenges

- Time wasted on manual data entry
- Inefficient processing of documents or emails
- Puzzling customer onboarding processes

### Business Benefits

- Time and money saved thanks to automation
- Focus on value adding, important tasks
- Deliver great customer experience

“We now save 40% of our time processing a single invoice and we handle 3,5 Million per year.”  
“Our conversion rate for onboarding clients went up with double digits!”

### Complete solution

More than an API connection, covering the entire workflow.

### Fast time to set-up

Up and running in a few weeks.

### Self-learning

Our product trains itself to become better & faster.
