

Senior Python Engineer

Become part of the most promising SaaS company in Intelligent Automation. Our solution automates cognitive tasks, reducing the workloads from critical but repetitive business processes. [Check out what we do in this video.](#)

Are you the Senior Python Engineer we are looking for, and will we together realize our bold ambitions? Join our team and play a leading role in building our Software-as-a-Service product.

What will you do?

- Contribute to or lead development on a SaaS product with a modern stack
- Ensure the best coding practices are adhered to throughout the company
- Work closely with other engineers (AI/front-end/infra) to align all development efforts
- Solve coding problems and eliminate performance bottlenecks
- Advance the various aspects of our self-learning product in line with our roadmap
- Above all, ship lots of high-quality code in every sprint!

Who are you?

- An expert in Python (inspire good coding practices and help improve others' code quality)
- At least 2 years of experience working with modern python, preferably in an agile team
- Proven track record in software engineering, preferably on a product
- You have experience building a modern SaaS stack consisting of:
 - API frameworks in python (f.e. Django, Flask, ...)
 - NoSQL Databases and ODM (f.e. mongoDB)
 - Task brokers and message queues (f.e. celery + AMQP + redis)
 - General software design pattern knowledge and PEP8
 - CI/CD and pipelines (GitHub, GitLab, Jenkins or Bitbucket)
 - Cloud infrastructure such as AWS, Azure or GCP
 - Unit and integration testing, including advanced mocking

What do we offer you?

- Unique coding and technical challenges with many opportunities to learn and improve skills
- Attractive salary, bonus scheme and stock option plan
- A company car, biking mileage reimbursement or public transport subscription
- Quarterly offsites, frequent after work drinks, etc.
- 25 days vacations per year, allowed from your first year, in addition to public holidays
- Attractive salary package with holiday pay in June and end of year pay in December
- Hospitalization insurance, disability coverage, life insurance, and extra pension contribution
- Mobile phone plan, eco-cheques, and monthly net stipend
